

Get running on green power!

BC Hydro works with the Government of B.C. and FortisBC to offer provincial rebates for the purchase and installation of electric vehicle (EV) chargers and infrastructure to get homes and workplaces across B.C. ready for EVs. This program is part of the province's CleanBC plan to make clean transportation more affordable and accessible for British Columbians.

- Single family homes can receive up to \$350 in rebates.
- Apartment, condo buildings and workplaces can receive up to \$14,000 in rebates when purchasing and installing standalone EV chargers.
