RE: Philips® InstantFit LED T8 Lamps with EasySmart and Leviton G13 Lampholders

Philips Instantfit LED T8 Lamps with EasySmart technology, which utilize the existing or external ballast/driver, are suitable for use with Leviton G13 lampholders. The user must adhere to the Philips' compatibility specifications contained with their product literature.

Leviton does NOT recommend use of self-ballasted LED lamps with these lampholders. Should Leviton become aware of any information that would cause Leviton to revise these opinions, Leviton will provide further notification.
